

Automated File Backup, Sync, and Monitoring for Windows

Transfers files from any source to any number of destinations simultaneously — local folders, FTP, S3, WebDAV, and email

WHAT ANYFILEBACKUP DOES

- › **Backup** — Copies or moves files from a source to one or more destinations. Four transfer modes: No filtering (all files), Incremental, Decremental, and Mirroring.
- › **Monitoring** — Watches a source for new, changed, or deleted files and triggers configured actions the moment any are detected.
- › **Clean-Up** — Permanently removes files from a source based on age, size, name, or attribute filters.
- › **Run Actions** — Pure orchestration — sends emails, runs scripts, executes other tasks, or sets variables on a schedule or on demand, with no file transfer involved.

SOURCES	DESTINATIONS
› Local and LAN folders	› Local and LAN folders
› FTP · FTPS · SFTP · TFTP	› FTP · FTPS · SFTP · TFTP
› S3-compatible cloud storage	› S3-compatible cloud storage
› E-mail mailboxes (IMAP / POP3, POP3S)	› WebDAV
	› E-mail via SMTP, SMTPS

One task writes to any number of destinations simultaneously. Each destination independently controls its own file filters and file transformation.

SCHEDULING

Type	Description
Regular	Time-based — from simple daily/weekly dropdowns to full six-field CRON expressions
Real-time	Fires the instant the OS reports a filesystem change (local and LAN folders only)
Manual	On demand — the user activates the task when needed
Linked	Triggered by another task via an Execute task action; turns a task into a dependency target

FILE FILTERS

Mode	Behaviour
No filtering	All files transferred on every run
Incremental	New and changed files only
Decremental	Propagates deletions to the destination — does not copy files
Mirroring	Incremental + Decremental combined

Optional filters

- › **Source level** — Include or exclude files before they enter the transfer pipeline
- › **Target level** — Accept or reject files per destination, after source-level filtering

Both levels support plain text, wildcards (* and ?), and regular expressions. Additional source-level criteria: date, file size, and attributes.

AUTOMATION

Four action types are available at activation, schedule, per-file, and on-completion stages of every task:

- › **Send e-mail** — Notify recipients on any event
- › **Execute application** — Launch an executable, script, or batch file; optionally wait for completion
- › **Execute task** — Chain tasks — the triggered task completes its full scenario before the caller proceeds
- › **Set variable** — Pass runtime values between tasks using named variables and macro strings

At the On Completion stage, each action fires on a condition of your choice: always, on success, on error, or when no files were processed.

SECURITY

- › **Transport** — FTPS (Implicit SSL), SFTP (SSH), WebDAV over SSL/TLS
- › **Encryption** — PGP public-key and ZIP password encryption, configurable independently per destination (File Encryption extension)
- › **Access control** — Named user accounts with granular permissions; remote access over TCP 18440
- › **Windows Service** — Runs under a dedicated service account; survives logoff; starts automatically at boot

SYSTEM REQUIREMENTS

Operating system	Windows 10 (21H2 or later), 11, Server 2019, Server 2025 — x64 only
RAM	16 GB
Disk space	100 MB
Installer size	40 MB

LICENSING

Trial	30 calendar days, free, no registration or credit card required
Personal non-commercial use	Free indefinitely after the trial period — no purchase required, trial limitations apply
Full version	€99 per year — 24/7 uninterrupted operation, 50 simultaneous tasks, all activation modes
Additional Tasks extension	€39 perpetual — adds 50 simultaneous task slots; stackable; requires active Full version licence
File Encryption extension	€39 perpetual — PGP and ZIP password encryption; requires active Full version licence

Personal use: Free for personal non-commercial use — no time limit, no purchase required.

Volume and corporate discounts available. Payment via PayPro Global. Licence key delivered by e-mail within 48 hours.
